It is with great thanks to:

Charles KC3JQW      Tom WA6VZN      Jason KA3SIQ      Rob KD3COZ  
Joe HD3BCI      Sam W3EAT      Rick AB3XJ

(I hope I did not miss anyone) for their hard work in re-installing an End Fed Half Wave (EFHW) antenna at the clubhouse.

This is a different style and more robust installation which will allow for easy raising and lowering for service and adjustment. There were several trees and vines that did not want the installation, but after a couple hours of wailing and grinding of teeth, they relented.

After a little testing and adjustment, it will be ready for use. With the wire running in the opposite direction of the Off-Center Fed dipole (OCF), this will continue to give us broad coverage on most bands

Regards,

**Richard A. Steer (AB3XJ)**

Assistant Treasurer
